Overview

Emergency responders from health and public safety desire training that allows them to coordinate their response efforts and build expertise both within their units and in collaboration with other jurisdictions and agencies. This series of three classes offers that opportunity and provides classroom training critical to the success of local and regional drills. The classes are Command, Emergency Operations Center, and Anatomy of a Disaster.

Outcomes

Outcomes are based on National Incident Management System (NIMS) components for disaster training events. Not all outcomes apply to each class:

- Perform functions of command and management
- Implement discipline-specific preparedness to terror response
- Execute resource management and mutual aid
- Implement appropriate information management
- Employ supporting technologies, as needed
- Perform ongoing management and maintenance

Instructional Team

Training will be conducted by Rescue Training, Associates (RTA) from Pompano Beach, Fla. Many of RTA's instructors have presented in Kansas on a number of occasions and are familiar with recent disasters that have occurred here.

RTA's team of expert instructors has had on-site involvement and leadership roles in some of the world's major disasters, including 9/11 terrorist attacks, the Oklahoma City bombing, numerous hurricanes (including Hurricane Katrina), the ValuJet crash, earthquakes and others.

Moreover, instructional staff have presented multiple training programs and designed and facilitated mass casualty simulations throughout the country. The majority of RTA instructors serve on FEMA Urban Search and Rescue Teams or Disaster Medicine Assistance Teams.

Class Training Schedule

All classes are held 8 a.m.–5:30 p.m. with an hour for lunch (on your own). Registration begins at 7:15 a.m. the first day of each course.

Hays

	CLASS	20-Apr	21-Apr	22-Apr	23-Apr
1	Command	all day	all day		
2	Emergency Operations Center			all day	all day
3	Anatomy of a Disaster		all day		

Pittsburg

	CLASS	13-May	14-May	15-May	16-May
1	Command	all day	all day		
2	Emergency Operations Center			all day	all day
3	Anatomy of a Disaster		all day		

Command Class

This two-day training prepares command personnel and other government leaders to direct disaster incident operations. Selected topics include disaster planning, incident command systems (ICS), incident actions plans, ICS forms, emergency support functions, logistics, command hand-off, 24-hour disaster command functions, interoperability/communications, medical and cost recovery.

Small group activities, exercises, and hands-on experiences will reinforce material covered by allowing participants to problem solve and practice using the information and tools covered in the class. Class materials include numerous sample forms, sample reports, checklists and tools useful to individuals involved in incident command.

Note: Participants enrolled in the Command Class can also enroll in the EOC class.

Emergency Operations Center (EOC) Class

This two-day NIMS compliant training course prepares leaders from a variety of institutions and agencies—fire, law, EMS, hospitals, public health, public works and others—to direct the emergency operations center where coordination and management decisions are made. Selected topics include emergency support functions, information systems, the unified command structure, EOC tactical operations, response and recovery and planning and scheduling.

Small group activities, exercises, and hands-on experiences will reinforce material covered by allowing participants to problem solve and practice using the information and tools covered in the course. Course materials include numerous sample forms, sample reports, checklists and tools useful to individuals involved in the emergency operations center.

Note: Participants enrolled in the EOC Class can also enroll in Command class.

Anatomy of a Disaster Class

This one-day seminar is designed for emergency responders, public officials, public health and hospital personnel involved in disaster response. It provides an excellent overview of the on-scene activities as well as management and support functions during a disaster. Topics include the roles and responsibilities of various emergency response sectors—fire, law, EMS, hospitals, public health—and how these agencies operate in an integrated and coordinated manner. The seminar will cover the roles and responsibilities of public and elected officials, incident command, emergency operations center (EOC), local jurisdiction, and state and federal government in the response and recovery phase of a disaster.

Acknowledgements

Programs in Hays are sponsored in conjunction with the Ellis County Office of Emergency Management, Hays Medical Center and the Northwest Regional Homeland Security Council. We are grateful to the Ellis County Fairground Association for the donation of training rooms.

Programs in Pittsburg are sponsored in conjunction with SE KS Hospitals-All Hazards Preparedness, Mt. Carmel Regional Medical Center, Southeast Regional Homeland Security Council and EagleMed.
